Hi Jalaj,

We have updated the project publish report once again.

Here are some details on your queries:

1. Report title has been fixed
2. Approved column indicates the status of task at the time of publish. If task was approved when publish was done, it will show 'Yes', else 'No'
3. Multiple publish on same date will now reflect as separate data columns (earlier unique dates were considered, now each publish event will be considered)

Please check once again at your end and let me know if any issues.

Regards,

Prashant

Hi Jalaj,

Hope you are doing well.

We have added the new report for 'Project Publish Log'.

This report will display list of tasks and changes to planned start and end dates for each publish event.

Please check this and le me know if any changes are needed.
It will start showing data for new publish events and not for the publish events that have already taken place.

Regards,

Prashant
